Clarifying integration tasks

I'll check the available Replit-managed AI integrations and set up Anthropic without touching project files or workflows.

16 actions

I found the Replit-managed AI setup tool. The Anthropic settings aren't present yet; I'm checking the setup flow's required inputs so I can enable it without changing any files.

2 actions

Verify your phone to use Replit AI Integrations

Cancelled by the agent.

Worked for 1 minute — Free · No credits used

Checkpoint made 2 days ago

Phone verification is complete. I'm retrying Anthropic setup now, then I'll confirm Replit reports the managed settings as available without displaying any secret values.

4 actions

Anthropic's Replit-managed integration is set up. Both required settings are available, and I didn't change any files, install packages, or modify workflows or `.replit`.

The app port is still pending because your instruction prohibited project changes. Would you like me to continue porting it now?
